

Home Fitness Routine

A simple weekly fitness routine can be done at home with no equipment. This guide covers the basics for beginners.

Warm-Up

Start with five minutes of light cardio: marching in place, arm circles, and hip rotations. Warm-up is essential before any workout.

Bodyweight Exercises

Bodyweight exercises include squats, push-ups, lunges, planks, and burpees. Aim for three sets of ten repetitions of each exercise.

Cool-Down

Finish with five minutes of stretching. Focus on the muscles you worked: quadriceps, hamstrings, chest, and shoulders. Hold each stretch for 30 seconds.

Frequency

Beginners should aim for three sessions per week. Rest days are essential for recovery and muscle growth.
